If you can plot the data from your investigation in a bar graph of averages, with three or more bars, (like the graph shown) then ANOVA may be a good statistical test for you to use. To compare two means, the t-test works well and will give the same results as the ANOVA. This unit planner template is a simple table, with sections for each aspect required by the IB standards and practices together with reminders in pale font color. Play a game of Kahoot! here.
