Forensic science is the application of science to criminal and civil laws, mainly—on the criminal side—during criminal investigation, as governed by the legal standards of admissible evidence and criminal procedure. A lateral thinking process, brainstorming demands that people come up with ideas and thoughts that can seem shocking or crazy. By using these ideas as a starting point, you can then change and improve them into something useful and original. An Educational Service for Clinical & Forensic Psychiatrists, Psychologists, Other Forensic and Mental Health Professionals, Attorneys, and Judicial professionals (Students & Trainees Welcome!) During the mid-20th century, the philosopher Karl Popper emphasized the criterion of falsifiability to distinguish science from non-science. Statements, hypotheses, or theories have falsifiability or refutability if there is the inherent possibility that they can be proven false.
