

Download Natural Gas Markets In India

Natural gas is a naturally occurring hydrocarbon gas mixture consisting primarily of methane, but commonly including varying amounts of other higher alkanes, and sometimes a small percentage of carbon dioxide, nitrogen, hydrogen sulfide, or helium. It is formed when layers of decomposing plant and animal matter are exposed to intense heat and ...10th CGD BIDDING ROUND 9th CGD BIDDING ROUND: What's New: What's New Archive: View All...India and China are consuming more natural gas and oil, but nowhere near what Americans use. If that were to ever change, global energy markets would quake. The Independent Barents Observer reports that the first ever shipload of liquefied natural gas (LNG) from Russia's Arctic has reached India via the Northern Sea Route.
