

# Download Organic Food Production Safety Quality

Organic Toxins Mycotoxins, such as aflatoxins, in food are extremely harmful to both humans and animals. Persistent organic pollutants (POPs), like PAHs and dioxins, may contaminate the food supply through intentional and inadvertent chemical production. Food safety is a growing concern in Chinese agriculture. The Chinese government oversees agricultural production as well as the manufacture of food packaging, containers, chemical additives, drug production, and business regulation. OSI Food Solutions Germany GmbH, OSI Europe Foodworks GmbH, OSI International Holding GmbH und OSI Foods GmbH & Co., KG Senefelder Str. 17a 86368 Gersthofen Ample technology exists for the detection of foreign material in foodstuffs to ensure food safety, which should be complemented by quality control practices.
