

Download Sony Bravia Sound Cuts Out Solution

Verify the Sony Bravia TV's audio settings to solve common sound problems. For example, if an external audio system is selected as the audio output, the TV speakers will be disabled. I have a 46HX803 and while watching in Freeview HD the sound intermittently cuts out Solved! Go to Solution. Does this only happen when watching Freeview HD channels, and not Freeview SD channels? Does the audio drop out when one scene cuts to the next? If so, this could be a dynamic switching issue Sony BRAVIA sound cuts in & out Yes, I have the same problem and my LCD TV is just over a year old (out of warranty period!!!). The sound cuts out intermittently for just about a second, long enough for me to miss words and I agree, it's VERY frustrating. I need to know how to fix the sound on my Sony TV. Pump up the volume. I hate that song. I mean, turn up the volume. Maybe someone else turned it down without you knowing it.
