Risk is the possibility of losing something of value. Values (such as physical health, social status, emotional well-being, or financial wealth) can be gained or lost when taking risk resulting from a given action or inaction, foreseen or unforeseen (planned or not planned). Tanmay Bakshi, at the age of 14, has already spoken to over 150,000 people live world wide about programming and its value for society. His passion for programming began when he started coding at the age of five, where he fixed his schools computers.
